A GLOBAL, SAFE AI SPACE FOR SCHOOL COMMUNITIES

Learn about the world *with* the world with Mundo our AI classroom assistant

Mundo means **earth in Spanish** and at the DCI, we model how to **learn about the world,** *with* **the world** to **create safe spaces** for ourselves and others, **to solve problems**, and ultimately **to be a force for good both on and offline.**

Are you safe to use in school?

Yes, I can be used in school settings. As an AI language model, I can provide educational assistance, answer questions, and offer information on a wide range of topics. However, it's important to note that while I strive to provide accurate and reliable information, I may not always have the most up-to-date or context-specific knowledge. Therefore, it's always a good idea to supplement my responses with additional research or consult with a teacher or trusted adult for confirmation.

When using any technology in a school setting, it's important to adhere to the policies and guidelines set by the educational institution. This ensures that the use of AI, like any other educational tool, is in line with the school's objectives and supports a safe and productive learning environment.

Do you watermark your responses?

No, as an AI language model, I do not watermark my responses. The text you receive from me is generated solely to provide information and assistance. However, it's important to note that while I strive to provide helpful and accurate information, it's always a good practice to verify and cross-reference the information I provide from reliable sources.

What age do you recommend to use your service?

My service is generally recommended for users who are 13 years of age or older. This is in line with the guidelines set forth by many online platforms and regulations such as COPPA (Children's Online Privacy Protection Act). For users under the age of 13, parental consent and supervision are advised when interacting with online services like mine.

It's important to prioritize the safety and well-being of younger users and ensure they have appropriate guidance and support while using any online platform or service. If you have any

concerns or questions regarding the age appropriateness of my service, it's always a good idea to consult with a parent, guardian, or educator.

Do you collect any personal information?

As an AI language model, I don't have access to personal data about individuals unless it has been shared with me during our conversation. I am designed to respect user privacy and confidentiality. My primary function is to provide information and answer questions to the best of my knowledge and abilities. If you have any concerns about privacy or data security, please let me know, and I will do my best to address them.

Are you GDPR compliant?

OpenAI, the organization behind the AI language model, has taken steps to ensure compliance with the General Data Protection Regulation (GDPR). As an AI language model, I don't process personal data unless explicitly provided by the user for the purpose of the conversation. OpenAI's data usage policy outlines how they handle user data and strives to protect user privacy and confidentiality. If you have any specific concerns about GDPR compliance or data security, please let me know, and I will do my best to address them.

How do we reference any information we find and use here?

When referring to information you find and use from here, it is best to attribute it to OpenAI's GPT-3 Model, which powers Mundo, this AI Assistant. You can mention that the information or response was generated by an AI Language Model . For example, you can say, "According to OpenAi's GPT-3 Model" or "The AI Assistant provided by OpenAI mentioned that." Remember to exercise critical thinking and verify the information from reliable sources whenever possible.
